

Akash Kurdekar

Software Engineer – Full Stack

Hubli, Karnataka, India

akashkurdekar39@gmail.com — +91 9916390580 — GitHub — LinkedIn — Portfolio

Summary

Software Engineer with 2+ years of experience delivering production applications, owning features from requirements to deployment, and solving technical challenges. Experienced across the application lifecycle, collaborating with clients and cross-functional teams to deliver reliable, user-focused solutions. Seeking to grow into a strong full-stack engineer and take ownership of larger systems.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, Angular.js, Tailwind CSS, Bootstrap, SPA Development, Component Architecture, Responsive Design

Backend: Node.js, Express.js, REST APIs, MongoDB, MySQL, API Development

Architecture & Security: Microservices, RBAC, JWT Authentication, Modular Architecture

Testing & DevOps: Playwright, Postman, Docker, CI/CD, Git, GitHub, Agile, Scrum, Jira, Code Reviews

Performance & UI: Lazy Loading, Code Splitting, Rendering Optimization, Chrome DevTools, Figma, Accessibility

Experience

Frontend Engineer

Feb 2025 – Present

IngeniousPix Creative Studios

- Delivered and launched **10+ production-ready full-stack and frontend web applications**, owning features from requirements and Figma/Adobe XD designs through development, testing, CI/CD, and production deployment.
- Developed and integrated **REST APIs, MongoDB-backed workflows, and microservices**, connecting backend services with frontend applications and building data-driven dashboards.
- Implemented **automated testing and API validation** using Playwright and Postman to improve application reliability and release quality.
- Built and integrated an **AI-powered bot** into a web application, connecting AI capabilities with application workflows to support user interactions.
- Supported **cloud-based application deployment and services**, delivering applications from development through production environments.
- Improved website performance to **98% performance scores** through lazy loading, code splitting, rendering optimization, and asset optimization; technical SEO improvements contributed to a **30% increase in users**.
- Diagnosed and resolved production issues across application logic, APIs, microservices, database workflows, state management, responsive behavior, and browser compatibility.
- Owned end-to-end delivery of a client product, launching its MVP and evolving it into a complete e-commerce platform within the following **3 months**; collaborated with clients, product, design, backend, and SEO teams.
- Participated in code reviews, Agile development, technical discussions, and release activities while mentoring a frontend intern for **3 months**.

Full Stack Developer Intern

Aug 2023 – Oct 2023

Deshpande Startups Infinity Studio

- Developed and integrated a full-stack marketplace platform using React.js, Node.js, Express.js, and MongoDB, building reusable components and REST API workflows for product, inventory, customer, and order management.
- Designed and worked with **MySQL relational databases using MySQL Workbench** to store and manage product and seller data, integrating database-backed services with application workflows.
- Worked across frontend and backend layers to connect business requirements, REST APIs, database operations, and user-facing workflows while collaborating with vendors and stakeholders in an Agile environment.

Full Stack Web Development Intern

May 2023 – Jul 2023

Varcons Technologies Pvt. Ltd

- Delivered full-stack features across **10+ client projects** using React.js, Angular, TypeScript, Node.js, REST APIs, HTML5, and CSS3, building reusable components, dashboards, and application modules while integrating frontend and backend workflows.

Projects

Wholesale Order Management System (B2B)

MERN Stack / Microservices

[GitHub](#)

- Built a full-stack B2B Order Management System using **React.js, Node.js, Express.js, and MongoDB** with independently organized services for authentication, products, inventory, customers, orders, and payments.
- Designed and integrated **REST APIs** across services for product, inventory, customer, order, payment, and order-status workflows, with reusable React.js interfaces and comprehensive application states.
- Implemented **JWT authentication and role-based authorization** for separate customer and administrative interfaces.
- Separated business responsibilities into distinct services to improve maintainability and allow individual application capabilities to evolve independently.

Education

Bachelor of Engineering (B.E.) in Computer Science

2020 – 2024

Jain College of Engineering and Technology, VTU **CGPA: 7.06/10**
