

Akash Kurdekar

Full-Stack Software Engineer

Hubli, Karnataka, India

akashkurdekar39@gmail.com — +91 9916390580 — GitHub — LinkedIn — Portfolio

Summary

Full-Stack Software Engineer with 2+ years of experience building and shipping production web applications using React.js, Angular, JavaScript, TypeScript, HTML, CSS, and Tailwind CSS. Experienced in developing SPA architectures, reusable UI components, REST API integrations, responsive interfaces, and performance-focused frontend experiences. Strong experience translating Figma designs and product requirements into production features, debugging cross-browser issues, collaborating with cross-functional teams, and driving frontend delivery from development through deployment. Experienced in mentoring and guiding junior developers through implementation, debugging, and code reviews.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, Angular, Vue.js, Tailwind CSS, Bootstrap, Responsive Design, SPA Development

UI/UX: Figma, Design Systems, Reusable Components, Accessibility, Cross-browser Compatibility

State & APIs: React Hooks, Context API, REST APIs, API Integration, Async Workflows

Performance: Performance Optimization, Lazy Loading, Code Splitting, Rendering Optimization, Chrome DevTools

Tools & Practices: Git, GitHub, Postman, Docker, CI/CD, Code Reviews, Agile, Jira

Experience

Frontend Engineer

Feb 2025 – Present

IngeniousPix Creative Studios

- Built and maintained production web applications primarily using Angular, JavaScript, TypeScript, Bootstrap, HTML, and CSS, developing reusable components, responsive layouts, filters, pages, and complex user-facing workflows.
- Translated Figma designs and product requirements into responsive, reusable frontend components while improving layouts, interactions, accessibility, and overall user experience across desktop and mobile.
- Integrated REST APIs into frontend workflows and contributed to backend changes involving database structures, routes, and controllers when required to support end-to-end product functionality.
- Debugged frontend issues involving API responses, application state, browser behavior, and responsive layouts, improving application stability and cross-browser consistency.
- Contributed to frontend performance optimization by improving component rendering, reducing unnecessary work, and applying appropriate loading and asset optimization techniques.
- Worked directly with clients, designers, backend engineers, SEO specialists, and other contributors to clarify requirements, propose product and UI/UX improvements, and deliver features through production.
- Took ownership of frontend delivery for a client project, coordinating requirements and milestones while driving the implementation from initial development through production deployment.
- Delivered the initial MVP within 3 months and subsequently contributed to transforming the website into a complete e-commerce platform, taking frontend features through production within the following 3 months.
- Built and shipped a standalone single-page application within 1 month and contributed to the development and production deployment of 10+ web projects.
- Mentored and guided a frontend intern for 3 months, providing technical direction, helping with implementation and debugging, reviewing code, and supporting their development throughout the internship.

Full Stack Developer Intern

Aug 2023 – Oct 2023

Deshpande Startups Infinity Studio

- Built reusable React components and responsive interfaces for a full-stack marketplace platform using React.js, Node.js, Express.js, and MongoDB.
- Integrated REST APIs with frontend workflows for product listing, inventory, and order management.
- Worked with local vendors to understand business workflows and translated requirements into practical UI and product features.
- Participated in Agile development, code reviews, and product discussions while iterating on frontend features based on feedback.

Full Stack Web Development Intern

May 2023 – Jul 2023

Varcons Technologies Pvt. Ltd

- Developed responsive frontend features across 10+ client projects using React.js, Angular, TypeScript, HTML, and CSS.
- Built reusable UI components, landing pages, dashboards, and feature modules based on client requirements and design specifications.
- Translated design concepts into responsive interfaces and integrated REST APIs to connect frontend features with backend services.

Projects

Wholesale Order Management System (B2B)

React.js, Node.js, Express.js, MongoDB

GitHub

- Built responsive React interfaces for product catalogs, customers, inventory, orders, payments, and order-status workflows.
- Integrated REST APIs and implemented loading, validation, error, empty, and success states across data-driven frontend workflows.
- Implemented JWT authentication and role-based authorization for separate customer and administrative interfaces.

Education

Bachelor of Engineering (B.E.) in Computer Science

2020 – 2024

Jain College of Engineering and Technology, VTU CGPA: 7.06/10
